Minasyan L.A., Silnitskaya E.A. Analysis of drugs condition among teenagers and effectiveness of preventive events in education sphere

It is held the analysis of social investigation of drugs situation in secondary education establishments. With the program and tools of applied investigations it is carried out the monitoring of drugs situation and revealed the level of anti drugs work among pupils. The realized consideration of the phenomenon is presented in the dynamics in comparison with the results of similar researches in 2005-2006 and 2007-2008 that is one of the key points of monitoring. The results showed that in the education space of the region there is a number of negative tendencies that can influence drugs distribution among teenagers. On the base of the results it is revealed the necessity to change school anti drugs programs from ineffective to effective system of primary preventive work with teenagers.

Key words: teenager, education, monitoring, drugs, school.
