Tishkova O.G. Formation of notarial activity in Russia from Xth century till 1917

It is considered the formation and further genesis of notarial activity in Russian from Christianity acceptance till October revolution in 1917. Within this period it is traced out the logics of appearance and development at first church and then state notarial of the Medieval Russia. In result of the bourgeois development private notarial systems is formed. The tendency of notarial system development indicates on the constant reduction of church notarial system. It was divided between state, registering deals in justice and private notarial activity proving civil and law deals.

Key words: church notarial system, state notarial system, private notarial system, sextons deal makers, notary public.
