Sokolov A.V., Isaeva E.A. Formation of non commercial sector in subjects of Russian Federation (on the example of Yaroslavl region)

This article discusses conditions of the development of the nonprofit sector in Russia at the regional level on example of the Yaroslavl Region. Quantitative and qualitative parameters of development of the nonprofit sector are characterized in the article. The legal forms of NGOs and public associations registered in the Yaroslavl region are examined. The main problems that cause weakness and disunity of the third sector is identified. Authors show the results of tests of NGOs, which are initiated by regulatory authorities. The article discusses how to use opportunities to cooperation provided by the federal and regional legislation to NGOs and governments, which may facilitate the inclusion of citizens in decision-making at all levels and formation of active and democratically-oriented people.

Key words: nonprofit organization, NGO, civic participation, civil society.
