### ***Stebletsova A.O. Discourse event as a unit of employment discourse analysis***

The article discusses a discourse event as a discourse analysis unit and as a means of discourse modeling. Employment discourse is represented as an interactional sequence of twelve discourse events: job announcement, reaction to job announcement, reference request, reference, etc. Each event, in turn, is analyzed by a set of relevant parameters, such as pragmatic aim, sequence position, communicants and text genre, text topic and from, communication key.

Keywords: employment discourse, discourse event, text type, genre, job announcement.
