Zhukov P.V. Risk management system in international trade corporations in Russia

It is considered the problems of establishing a system of risk management in the Russian MTC. As the main methodological line of the risk management system it is proposed shift from the traditional paradigm of risk management to integrated. The risk management process is proposed in this paper considered as a single project and identified with the project activity in the enterprise with the integration of all resources MTC. In the context of the studied project risk management process is analyzed as integrated scheme of the design process. As an optimization mechanism for improving risk management strategies in international trade corporations author suggests an evolutionary model of risk management, based on the identification of the stages of development of MTC and in accordance with their stage of development of the risk management system.

Key words: Russian international trading corporations, risk management process, evolution of risk management systems.
