Humanization of the pedagogical process in a context of value consolidation of medical university

It is considered the process of humanization of a medical university in the light of spiritual ties. Well-established after disintegration of USSR system of market values has worsen spiritual crisis in the Russian society a lot. Spiritual ties create certain guidelines for individuals and promote value consolidation of the whole society. All these actualize a leading hand of the humanities in the modernization of system of education and health affair that afterwards will cause the rise of the level of youth's civil activity and social trust in the society.

Key words: humanization, spiritual ties, socialization, consolidation of the society.
