Evolution of the world views in the context of environmental problems

The most important distinctive sign of people from animals is the capability to think and estimate surrounding reality. The behavior of people, efficiency rate of the tasks solved by them, certainly, depends on as far as it corresponds to the understanding of reality, correctness of estimation of a situation in which they should work and apply the knowledge. Its representation suits the world, what laws he/she submits is the cornerstone and as it is developing it presents a world picture. With development of humanity it is changing, expressing historically developed and interconnected "life network" in public consciousness.

Key words: picture of the world, technician, technology, scientific and technical progress.
