

## PEDAGOGY

***B.Ch. Meskhi***

*(Don state technical university. Rostov-on-Don, Russia)*

### **Innovative approach to education development**

Any reforms and transformations give proper results only on the basis of evidence-based approaches. Reforming education is carried out on the basis of innovative projects on creation of new state educational standards, changes in teaching methods, technologies and models with regard to social conditions, specificity and resource support for the regions needs and personal qualities of students. It is made the review of trends in the development of vocational training, types of innovations in the field of innovative educational activities, ways to implement innovation, classification of ideas and development of higher education teaching program structure of pedagogical experiment. It is offered advice on the use of multimedia technologies.

Key words: innovation, education, reform, experiment, technology.
