Social justice as the process of social interests realization

Investigating the problem of justice, the need for objective research and study of the role of social interests of various social groups and individuals as the basis for the realization of social justice is conceptually substantiated. Justice as a moral category and social value is the most important factor determining social practices, culture and spiritual life.

Key words: social justice, social sphere, social theory, society, Russian society, interests, needs, status, groups, individuals.
