Peculiarities of the lexical skills formation in the process of the English language teaching

It is considered the peculiarities of the lexical skills formation in the process of the English language teaching. The authors describe the main stages of work with the lexical units, as well as the difficulties arising during the work with foreign-language material. The main types of exercises that help to consolidate new lexical units are shown. Also some forms of control of the lexical skills formation are described.

Key words: lexical skills, communicative tasks, lexical units, the system of exercises.
