Semantic analysis of key words *отдых/досуг* and *repos/loisir* representing the concept of 'rest' in French and Russian languages

It has been considered the semantics of such key words as *отдых*, *досуг*, *repos*, *loisir*, which represent the concept of 'rest' in French and Russian languages. The aforementioned lexical units have been picked since they are the most common antonyms of the lexemes *работа* and *travail*, which name the respective concept. Special attention is paid to the etymological analysis of the studied lexemes, as well as to the analysis of their lexical compatibility with other words in order to uncover their semantic features. The article highlights features of the said lexemes that are not shown in the dictionaries, which are crucial for the appropriate translation from one language to another, as well as for defining the main attributes of the "rest" concept in Russian and French.

Key words: concept, work, rest, Russian, French.
