### **Pedagogical morality as a basis for the formation of the moral personality**

In modern society, the importance of pedagogical morality as a regulating and shaping mechanism is constantly increasing. It is an effective factor for the optimal realization of the social role of the teacher to stimulate and motivate creativity in the pedagogical process. In addition to the role-playing function, pedagogical morality also performs a professional-protective function related to specific professional interests, rights, traditions. Pedagogical morality (like any professional morality) regulates and forms the moral attitude towards pedagogical activity and moral relations in the pedagogical process, regulates and forms the moral behavior of the teacher.

Key words: education, learning, world view, knowledge, cognition, value orientation, culture, society.
