Training professionally oriented foreign language communication using distance learning for graduates of reclamation engineering institute

It is described the process of training graduate students in a foreign language professionally-oriented communication in the distance learning format using the Office 365 software product. The characteristic of the professional orientation of undergraduates in business communication is given, taking into account the norms and rules of etiquette of communication of the business environment. The educational process of undergraduates in conditions of self-isolation is analyzed. Social self-determination of youth through distance learning formats acquires its own characteristics, realizes its existence in the search and determination of life meaning and status. Business foreign language communication enhances the living status and self-determination space of a future specialist in the labor market. The features of scientific abstracting in the classroom – video conferencing are analyzed. The learner learns his own value systems, which leads to the formation of the personality in a professional personal orientation.

Key words: undergraduate, professionally oriented reading, distance learning, foreign language communication, youth, speech standards, landscape architecture, ecology, nature management.
