Pedagogical and social aspects of ethics in the context of historical development

It is stated that pedagogical ethics appeared together with the emergence of pedagogical activity as a special social function that determines education and upbringing. The status of pedagogical ethics in the system of philosophical and pedagogical knowledge is still in the formation stage, requires its development due to objective laws. According to the authors, the study of pedagogical ethics is of pedagogical and social importance, since the personality of the teacher, his moral and psychological features play a large role in the education of the younger generation.

Key words: personality, training, education, morals, moral development, humanization, pedagogical theories, society.
