### **Monitoring of distance learning by using Instagram social network**

The purpose of this study is conducting pedagogical control at distant education, which can fully reflect the quality of the educational process; and the possibility of its implementation using the multimedia platform of the social network Instagram. The scientific novelty of the study is realized in the development of recommendations and versions of possible control and measuring materials aimed at monitoring students' knowledge at distance education. The result of the study is the development of methodological recommendations that contribute to the full preliminary and current control at distant learning using the social network Instagram.

Key words: distance education, higher education, using a social network in education, distant control, Internet space.
