### **Environmental education: pedagogical aspect of philological research**

It is stated that in modern conditions environmental education becomes an integral part of the education of young people, acting as an aspect of any of its parties: moral, patriotic, aesthetic, labor. In this regard, it is important to talk about raising a careful and attentive attitude to the environment, expanding the knowledge and skills necessary for its protection and improvement, which are an integral part of the general system of education, education and training of pedagogical personnel. According to the authors, its important link is environmental education and the education of students-philologists of pedagogical institutes – future teachers and educators in the system of general education institutions

**Key words:** education, training, education, personality, society, nature, ecological culture, moral and esthetic relations.
