

## PHILOSOPHY

*Vadim N. Goncharov, Olga Yu. Kolosova*

*(Technological institute of service (branch) of the Don state technical university in Stavropol, Stavropol, Russian Federation)*

### **Philosophic analysis of modern environmental education**

It is analyzed the process of greening knowledge as a necessary requirement of modern science, which allows to form a worldview on the basis of humanism of social ecology. It relies on such general pedagogical principles as, systematics, scientific, continuous connection with social life. Certain systematic perception of environmental education is achieved due to the continuity of knowledge provided by inter-subject connections.

**Key words:** society, nature, sustainable development concept, civilization, culture, worldview, values, learning, upbringing.
