### **Students' ideas about the motivational intentions of transformative activity under conditions of uncertainty**

The analysis of modern researches of motivational intentions of transforming activity in the conditions of uncertainty is presented. The psychological advantages of semantic regulation of the activity of a developing personality are shown. The relevance of the formation of students' sustainable motivation, positive attitude, subjective involvement in the initiation of constructive personality transformations through self-development and self-education is substantiated. The paper shows that the motivational-semantic intention in the process of personality transformations is not limited to activity in the current situation, but focuses on pre-adaptation. For the first time, the results of an empirical study of the content of students' ideas about the motivational intentions of transformative activity under conditions of uncertainty are described. A program of psychological support for the formation of a culture of transformative activity among young people is presented, integrating the following interrelated modules: informational, motivational-semantic, developing, prognostic.

**Key words:** ideas, motivational intention, student, transformative activity, autopsychological competence, uncertainty.
