### **Syntactical expressive means in a scientific text**

The analysis of scientific prose texts in English made it possible to identify the most commonly used syntactic expressive means of a scientific text which include: inversion, comparative constructions, rhetorical questions, exclamatory sentences, imperative constructions, repetition. The highest degree of expressiveness is shown by scientific texts on social and humanitarian problems, natural science research texts come second, in third place texts there are texts of the medical genre, and on the far periphery there are texts of the engineering genre.

**Key words:** scientific prose, scientific texts, syntactic expressive means of a scientific text, inversion, comparative constructions, rhetorical questions, exclamatory sentences, imperative constructions, repetition.
