### **Philosophical and anthropological meaning of marriage and family relations**

It is considered the essence and relevant problems of family and marriage relations in their philosophical and anthropological consideration. The main trends in the development of the institution of the family are identified and ways to overcome the difficulties of its modern development are proposed. As a research task, it is attempted to assess the current situation in the country and the world related to the family crisis.

**Key words:** family, marriage, marital and family relations, social institution, anthropology, philosophical and anthropological meaning, socialization of personality, eternal problems of philosophy, child-parent relations, cultural unification, crisis of family life, principles of continuity, family policy.
