Structural and semantic analysis of the customs service development strategy in Russian Federation until 2030

Structural and semantic features, paradigmatic relations of economic and legal terms of the Strategy for the Development of the Customs Service of the Russian Federation until 2030 and the legal acts that make up its legal basis are analyzed. The sample consisted of terminological units of research interest in terms of its semantic value, normativity, frequency of use, accuracy, equivalence and adequacy of use. Comparative analysis of the NLA terminology systems and the Strategy for the Development of the Customs Service of the Russian Federation until 2030 made it possible to identify the most frequent terminological units of the legal and economic terminological systems, determine their lexical meanings, correlate the meanings of the NLA terms with their equivalents in the text of the Strategy and draw a conclusion regarding the scope of the concept of these terminological units, as well as the adequacy of their application in the text of the Strategy.

Key words: term; terminological system, linguistic analysis, legal act, Strategy for the Development of the Customs Service of the Russian Federation until 2030.
