Risks of digitalization in the formation of professional subjectivity of the individual

It is proposed to analyze the risky consequences of digitalization of modern society from the point of view of the formation of professional subjectivity of the individual. The processes of digitalization and the formation of professional subjectivity are analyzed in the context of ideas, concepts, and opinions that have developed in the socio-philosophical space on changing the very nature of the subject of activity in the era of total influence of digital and information technologies. It also uses the theoretical potential of related disciplinary practices – psychology, sociology, pedagogy, addressing the issues of digitalization as a factor of influence on a person and his/her professional development.

Key words: digitalization, digital society, professional subjectivity of personality, professional development, profession, work, risks of digitalization.
