Main features of political English slang and ways of its translation into Russian language

The main features and ways of transferring the political slang of the English language into Russian are considered. The works of outstanding scientists in the field of translation are analyzed. Based on the information obtained, the main characteristics and features of slang in the field of politics are described and systematized. The main ways of translating political slang are considered, among which the methods of explication, compensation, transcription and transliteration occupy an important place. The most commonly used transformation among the main translation techniques has been identified. Using the example of lexical units of the English language, the difficulties of decoding slangized vocabulary of a political orientation and ways to resolve controversial situations through the use of translation transformations are described.

Key words: translation transformation, political slang, lexical unit, decoding, translation.
