### **Organization of educational initiatives in a foreign language for students of engineering specialties**

The experience of conducting educational work in a foreign language for students of non-linguistic specialties of the Siberian Federal University (SFU) is analyzed. The possible types of educational and educational English-language activities are considered, an overview of the educational work of the Department of Foreign Languages for engineering areas of SFU is given. The practical experience of conducting language training and educational activities for students of engineering specialties aimed at increasing motivation to learn a language, as well as the formation of an active and well-rounded personality of a future specialist is presented.

**Key words:** students of engineering specialties, educational initiatives, motivation, a multiple personality, competitiveness.
