### **The social model of the educational space**

This article examines the role of the educational space in the socialization of students, as one of its main goals. An educational institution can have a dominant role on the personality of a student. It forms behavioral norms, forms of thinking and forms of communication in the student environment, which will be useful in the future in adult life.. The educational space is an object of educational activity and relationships between participants in the educational process. In the end, we can conclude that it is the educational process that is important for the development of a person's personality, contributes to the upbringing of an intelligent, literate, educated and socially active citizen.

**Key words:** personality, educational space, pedagogy, education, educational institution.
