

## PEDAGOGY

***Mariya L. Somko***

*(Admiral F.F. Ushakov State Maritime University, Novorossiysk, Russian Federation)*

### **Model of formation of economic culture of cadets of maritime specialties**

The concept of “economic culture of marine cadets” is revealed and the term “pedagogical model” is clarified. The results of both theoretical research in the field of education and the author's development of a pedagogical model for the formation of the economic culture of cadets of maritime universities are presented. The research is based on the conceptual provisions on the need for graduates of maritime universities to develop special professional skills that will ensure the development of the economy in the maritime industry during a period of instability.

**Key words:** pedagogical model, economic culture, cadets of maritime specialties, formation, professional skills.
