Value characteristics of spirituality as a way of being a human being

The article analyzes the relationship between the value sphere of a person and his spirituality. It is shown that the formation of spirituality is a systemic process of development and self-development, spirituality is organically linked to the integrity of the individual. Spirituality defines the ideas of human freedom, personal choice and life path. Spirituality is an integrated personality quality that encompasses the breadth of interests, the diversity of spiritual needs, the depth of spiritual, moral and aesthetic experiences, the pursuit and aspiration to the highest human ideals-values.

Key words: value, value sphere, personality, man, spirituality.
