Social work as a tool of social policy

The social policy of the Russian Federation, its key directions, as well as technologies of formation and implementation are considered. The need to ensure a high standard of living and social protection of the population is emphasized. Social work is presented in this study as a structure consisting of social supervision, social rehabilitation and social security. The methodology and methods of social work in the main areas of the state's social policy, such as motherhood and childhood, the maintenance and development of the institution of the family, and the rehabilitation of elderly citizens, are presented.

Key words: social policy, social work, social services, social supervision, social security, social rehabilitation.
