Reproduction of Intellectuals in University Spaces: Socio-Philosophical Analysis (Part 1)

The article considers the specifics of the reproduction of intellectuals in university spaces. The dynamics of changing ideas about education and upbringing in the socio-humanitarian discourse are examined. The key works of classical and modern authors are analyzed. The essential characteristics of education are presented. The explication of the meanings embedded in the symbolic capital formed by universities has been carried out. The connections between the concepts and modern variants of university formation of intellectual networks are demonstrated. It is established that the main emphasis is placed on the practice of mastering research competencies by subjects of education, which makes it possible to organize entire scientific schools and fulfill an urgent social order at a particular stage of historical development.

Key words: intellectuals, university, ideas, culture, values.
