Problems of interpreting hegemonic masculinity in cultural and philosophical terms

It is shown that the concept of hegemonic masculinity is criticized by representatives of various academic communities due to "controversial" attempts to prove that men and masculinity are synonymous categories. The effectiveness and expediency of the proposed issues related to gender-labeled phenomena is recognized. A cultural and philosophical revision of the concept of hegemonic masculinity is proposed, its elaboration in terms of the philosophy of culture.

Key words: hegemonic masculinity, gender hierarchy, discursive practices, cultural and philosophical model of masculinity.
